

SINEAX/EURAX U 700, Electrical Transducer for arithmetical AC voltage difference

The electrical transducer **SINEAX/EURAX U 700** measures the difference between two AC voltages, i.e. their arithmetical means (not the vectorial difference).

Available as output signal is a load-independent DC current or voltage, varying in proportion to the AC voltage difference. This output signal enables several receivers to be operated simultaneously – such as indicators, recorders, controllers etc. These may be located both close to the measuring point (field installation) or at a distance from it (control room).

The instrument is supplied in carrying rail housing SINEAX U 700 (Fig. 1) or as a plug-in module EURAX U 700 (Fig. 2).

Features / Benefits

- Measuring principle: Active rectifier
- Output signal: Load-independent DC current or impressed DC voltage

Mode of operation

The AC voltages U_G and U_S to be compared are isolated by instrument transformers, then actively rectified and smoothed. The arithmetical difference ($\Delta U = U_G - U_S$) of the two DC voltages, which is proportional to the measured values is passed through an amplifier and appears as a load independent DC output current or voltage.

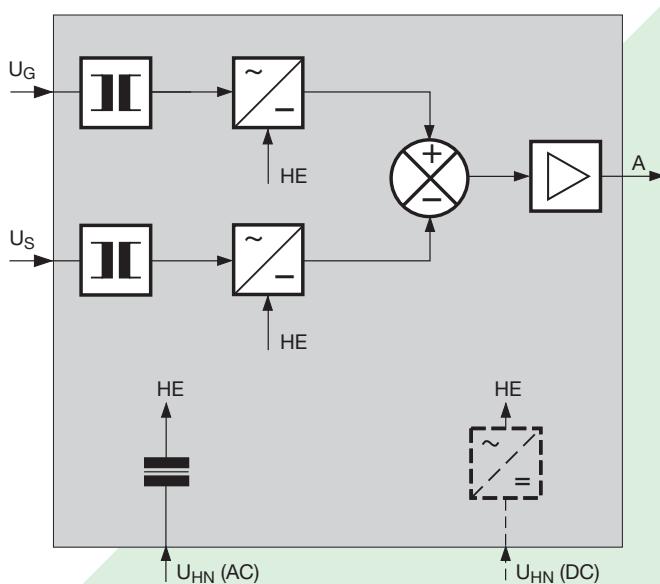

Fig. 3. Block diagram: U_G = Generator voltage,
 U_S = Bus voltage.

Fig. 1. SINEAX U 700 in carrying rail housing E16.

Fig. 2. EURAX U 700 as plug-in module for 19" rack-mounted case, front plate width 7 TE.

Technical Data

Mechanical design:

In carrying rail housing
SINEAX U 700 or as plug-in module
EURAX U 700

Input variables U_G and U_S

Measuring range ΔU :

$\pm 20\% U_N$

Nominal input voltage U_N :

For both inputs a value between
10 V and 500 V

SINEAX/EURAX U 700, Electrical Transducer for arithmetical AC voltage difference

| | |
|--------------------------------|--|
| Nominal frequency f_N : | 50 or 60 Hz |
| Own consumption: | Approx. $U_N \cdot 2 \text{ mA}$ |
| Threshold: | < 0.05% |
| Overload capacity (per input): | $1.5 \times U_N$ continuous $2 \times U_N$ during 10 s $3 \times U_N$ during 2 s |

Output signal A

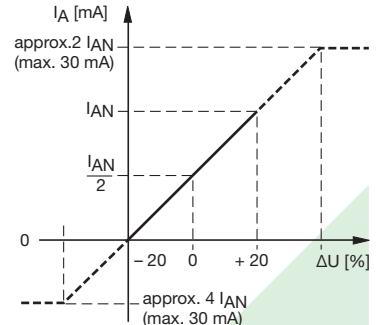

| | |
|------------------------------------|---|
| Output variable I_A : | Load-independent DC current or voltage, proportional to ΔU $(\Delta U = U_G - U_S)$ U_G = generator voltage U_S = bus voltage |
| Standard ranges of I_A : | 0 ... 1.00 to 0 ... 20 mA 1 ... 5 to 4 ... 20 mA -1.00 ... 0 ... 1.00 to -20 ... 0 ... 20 mA Burden voltage $\pm 15 \text{ V}$ External resistance |
| | $R_{\text{ext}} \text{ max. } [\text{k}\Omega] = \frac{15 \text{ V}}{I_{\text{AN}} \text{ [mA]}}$ |
| | I_{AN} = full scale output |
| Standard ranges of U_A : | 0 ... 1.00 to 0 ... 15 V -1.00 ... 0 ... 1.00 to -15 ... 0 ... 15 V 0.2 ... 1 to 3 ... 15 V Load capacity max. 10 mA External resistance |
| | $R_{\text{ext}} [\text{k}\Omega] > \frac{U_A \text{ [V]}}{10 \text{ [mA]}}$ |
| FSO variation: | Approx. $\pm 2\%$ |
| Current limitation: | I_A max. approx. 30 mA |
| Residual ripple in output current: | < 2% p.p. |
| Response time: | $\leq 500 \text{ ms}$ |

Behaviour of output current in different operating states:

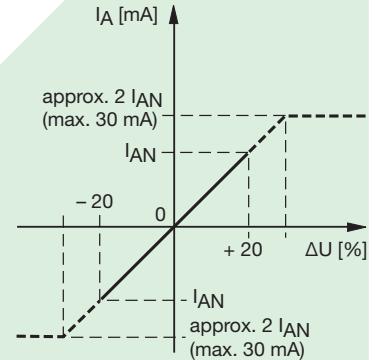

| Operating state ¹⁾ | | Output | Display |
|-------------------------------|-----------------------|----------|------------------------------|
| Generator voltage | Bus voltage | | |
| $U_G > U_S$ | | unipolar | $> I_{\text{AN}} / 2$ |
| | | bipolar | positive |
| missing ²⁾ | nominal value | unipolar | approx. -2 mA |
| | | bipolar | approx. -1.5 I_{AN} |
| nominal value | missing ²⁾ | unipolar | missing ²⁾ |
| | | bipolar | |
| missing ²⁾ | missing ²⁾ | unipolar | approx. $I_{\text{AN}} / 2$ |
| | | bipolar | approx. 0 |

Behaviour of output current when generator measuring range is exceeded
(Bus voltage = nominal value)

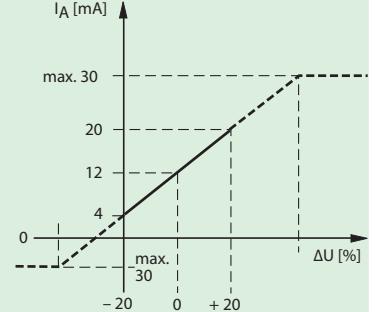

Unipolar output: Any value between 0...1 and 0...20 mA
(Burden voltage $\leq 15 \text{ V}$)
 $U_B = I_A \text{ max. } \cdot R_{\text{ext}}$

Symmetrical bipolar output: Any value between ± 1 and $\pm 20 \text{ mA}$
(Burden voltage $\leq \pm 15 \text{ V}$)
 $U_B = I_A \text{ max. } \cdot R_{\text{ext}}$

Live zero signal output: 4...20 mA
(Burden voltage $\leq 15 \text{ V}$)
 $U_B = I_A \text{ max. } \cdot R_{\text{ext}}$

Accuracy (acc. to DIN/IEC 688-1)

Reference value: Output span
Basic accuracy: Class 0.5

1) With power supply switched on
2) e.g. switched off or fault condition

SINEAX/EURAX U 700, Electrical Transducer for arithmetical AC voltage difference

Reference conditions:

| | |
|-----------------------|---|
| Ambient temperature | $23^{\circ}\text{C} \pm 5^{\circ}\text{C}$ |
| Input voltage | Within measuring range |
| Frequency f_n | $\pm 10\%$ |
| Waveform | sine-wave |
| Distortion factor | $< 0.5\%$ |
| Power supply U_{HN} | $\pm 20\%$ with AC 20 to 135 V with DC |
| Output burden | $0 \dots R_{ext}$ max. at I_A R_{ext} min. ... ∞ at U_A |

Influence effects (maximum values)

| | |
|---|--------------|
| (included in basic error) | |
| Linearity error | $\pm 0.1\%$ |
| Frequency influence $f_n \pm 10\%$ | $\pm 0.05\%$ |
| Dependence on external resistance ΔR_{ext} max. | $\pm 0.05\%$ |
| Distortion factor ($K < 0.5\%$) | $\pm 0.2\%$ |
| Power supply influence (ΔU_H max.) | $\pm 0.05\%$ |

Additional errors (maximum values)

| | |
|--|---------------------------|
| Temperature influence ($-25\dots+55^{\circ}\text{C}$) | $\pm 0.1\% / 10\text{ K}$ |
| External field influence 0.5 mT | $\pm 0.1\%$ |
| Distortion factor influence ($K < 10\%$) | $\pm 0.4 \cdot K (\%)$ |

Electromagnetic compatibility

| | |
|------------|---|
| Influence: | $< 2\%$ |
| IEC 801-2: | Electrostatic discharge (ESD) Housing: $\pm 6\text{ kV}$ contact $\pm 6\text{ kV}$ air |
| IEC 801-3: | Electromagnetic fields 20 – 500 MHz, 10 V/m CW ITU frequencies 10 V/m influence $< 2\%$ |
| IEC 801-4: | Electrical fast transient / Burst influence, input and output lines Burst: $\pm 1\text{ kV}$, 5/50 μs , 5 kHz, 2 min. Asymmetrical Burst: $\pm 2\text{ kV}$, 5/50 μs , 5 kHz |
| IEC 801-5: | Interference test Surge $\pm 1\text{ kV}$ AC, $\pm 0.5\text{ kV}$ = symmetrical Surge $\pm 2\text{ kV}$ AC, $\pm 1.0\text{ kV}$ = asymmetrical |

Power supply U_{HN}

| | |
|-------------|--|
| AC voltage: | 230, 115 V~, $\pm 20\%$, 42 to 70 Hz Power input $\leq 4.5\text{ VA}$ |
|-------------|--|

DC voltage:

24 to 110 V–, –15 ... + 33%
Power input $\leq 4\text{ W}$

Regulations

| | |
|-----------------------------|--|
| Impulse voltage protection: | 5 kV, 1.2/50 μs , 0.5 Ws acc. to IEC 255 – 4 Cl. III |
| HF-surge compatibility: | 2.5/1 kV, 1 MHz, 400 surges/s acc. to IEC 255 – 4 Cl. III |
| Electrical standards: | Acc. to DIN 57 410 and 57 411 |
| Housing protection: | SINEAX U700 (carrying rail housing E16), IP 40 Terminals IP 20 |
| Test voltage: | EURAX U700 (plug-in module) IP 00 acc. to EN 60 529 4 kV / 50 Hz / 1 min. between isolated circuits and versus housing (SINEAX U700) |

Environmental conditions

| | |
|-----------------------|---|
| Climatic rating: | Operating temperature $-10\dots+55^{\circ}\text{C}$ Storage temperature $-40\dots+70^{\circ}\text{C}$ Relative humidity $\leq 75\%$ annual mean |
| Altitude: | 2000 m max. |
| Indoor use statement! | |

Installation data for SINEAX U700

| | |
|-------------------------|---|
| Dimensions: | Carrying rail housing E16 (see section «Dimensional drawings») |
| Housing protection: | IP 40 acc. to IEC 529 |
| Mounting position: | Any |
| Electrical connections: | Screw-type terminals with indirect wire pressure, for max. $2 \times 2.5\text{ mm}^2$ or $1 \times 6\text{ mm}^2$. Protection IP 20 acc. EN 60529 |
| Weight: | Approx. 1.0 kg |

Installation data for EURAX U700

| | |
|-------------------------|---|
| Dimensions: | Plug-in module in Euro format, 100 x 160 mm, 7 E (E = 5.08 mm) (see Section «Dimensional drawings») |
| Housing protection: | IP 00 acc. to DIN 40 050 |
| Front plate colour: | Grey RAL 7032 |
| Mounting position: | Any |
| Electrical connections: | 32-pole plug acc. to DIN 41 612, pattern F (contact fitting see Section «Electrical connections») Protection IP 00 acc. to EN 60529 |
| Weight: | Approx. 0.6 kg |
